## **ValuPak** **7-12-1**

ValuePak 7-12-1

**ValuPak** is a pure seaweed concentrate containing organic plant growth stimulants and should be used in conjunction with normal fertilizer programs.

**ValuPak** contains small amounts of macro-and micro-nutrients, including phosphorus, potassium, nitrogen, sulphur, calcium, sodium, magnesium, iron and manganese; various amino acids; vitamins B1, B2, C and E; but most importantly cytokinins, auxins and gibberellins.

**ValuPak** is a liquid fertilizer which puts the nutrients exactly where you meant for them to go, inside the plant and into the available reserves in the soil. **ValuPak** not only feeds the plant but also stimulates microbial activity in the soil, so those nutrients in the soil are put to maximum use and held in an available form. **ValuPak** stimulates plants to produce higher yields, particularly in crops like apples, tomatoes, mellons, cotton and other crops where fruit set is important.

There are many benefits of **ValuPak**. These benefits include:

- Enhanced crop survival and recovery after stress-inducing conditions
- Reduced lodging of cereal crops as a result of stronger stems
- Improved natural resistance of plants to pests and fungal diseases, leading to a generally healthier stronger crop
- Hastened seed germination
- Improved seed germination
- Stronger, healthier, more even growth of plants
- Improves crop quality
- Increased nutrient availability in the growing medium
- Increases fruit retention
- Increases fruit size
- Promotes a stronger root system

### **GUARANTEED ANALYSIS:**

Nitrogen (N) ..... 7.0%  
7.0% Urea Nitrogen  
Available Phosphate (P2O5).....12.0%  
Soluble Potash (K2O5) ..... 1 .0%
