

BorPak is a foliar spray for cotton, vegetables, trees and other crops. BorPak can also be applied to the soil where boron levels are low.

BorPak is a chelated boron package containing essential vitamins and enzymes. BorPak is immediately available for plant uptake and reduces potential nutrients loss.

BorPak Micronutrient Package includes:

- 7.5% Chelated Boron
- Vitamin B Complex
- Riboflavin
- Niacin
- Celluace
- Panothenic Acid

### **BorPak Benefits:**

- Can be foliar or soil applied
- Compatible with most spray solutions
- Has a neutral pH
- Is a requirement for all plants
- Increases cell wall strength and growth
- Increases fruit retention
- Utilized for fruit and seed development
